

A PRINTING HOUSE
FOR THE PREMIUM
BRANDS

LOGIK
PRINT & POSTPRESS

OUR MISSION

ABOUT LOGIK

The LOGIK Group belongs among the largest printing companies in the region of Central and Eastern Europe. Since it was founded in 1999, it has been undergoing major continuous development and growth, focusing on our main target: offering our customers the whole complex of printing services.

Since 2012, LOGIK's main production plant have been in a newly renovated and expanded site in Prague 9 – Libeň, the other production plant and logistic centre is in Prague – Horní Počernice. The main production plant contains five sheet offset printing machines for up to B1 format and up to 7 colours, prepress, formatting, cutting, bookbinding, twin-wire and other services. A secondary plant houses our B0 sheet-fed offset printer.

Because of the continuous investment and innovation, LOGIK can offer its clients not only speed and quality of print, but, more importantly, reliable and timely supplies thanks to suitability of our Heidelberg machine line-up. Apart from four Heidelberg machines, we use a top quality KBA Rapida B0 offset printer. For low volume digital printing, including variable data, we use state-of-the-art Xerox technology.

Premium product packaging, sales promotion materials and other products are among the main products of LOGIK. Our technology enables the production of basic printed products and luxurious products as well.

We offer all types of designs thanks to our fully equipped production plant, product finishing, including hot stamping and blind stamping, partial varnish, exclusive materials, etc. Our own construction and design departments make every project special.

We look forward to working together.

The LOGIK Team
